Making Technology Work for You!

Why Attend

Radiology has been developing dramatically during the past few years. With enhancements in magnetic resonance imaging (MRI) and computed tomography (CT), the role of the radiologic technologist has also been changing. Skills in cross-sectional anatomy are important to help the technologist in MRI and CT to identify the anatomy being imaged and to communicate effectively with the radiologist and physicians.

This seminar is offered in your area to provide you with the opportunity to expand your knowledge of body cross-sectional anatomy and its appearance in CT and MRI images.

Who Should Attend

- Radiologic Technologists
- CT Technologists
- MRI Technologists
- Student Technologists

The Instructor

Debra A.Kendall M.Ed, RT(R)(CV)(QA)(CT)

Debra is the program director for both El Centro College's Radiologic Sciences and Computed Tomography programs. She holds a Masters Degree in Education with a specialty in Instructional Technology from Texas Technical University in Lubbock Texas. She has 30+ years experience in education, diagnostic radiology and computed tomography. Debra has been teaching cross-sectional anatomy for many years.

Objectives

At the completion of this seminar, participants will be able to:

- identify cross-sectional anatomy in the sagittal, coronal and axial planes on CT and MR images.
- recognize normal anatomy and build a personal resource system for future study.
- locate and identify pertinent cerebral, upper thorax, mid-thorax, and abdominal anatomy.
- identify on CT and MR images, anatomical structures of the body.
- distinguish between arterial and venous anatomy.

Continuing Education Credit

This program provides 8 hours each day of Category A continuing education credit for radiologic technologists. This course will also provide 6 credits per day for MDCB. A certificate of attendance will be provided for each individual upon completion of the seminar. All attendees must attend the entire seminar to receive full credit. Credit is awarded for radiologic technologists as ARRT Category A Credit approved by the ASRT, and credit from various licensure states.
