

# Breast Ultrasound Course

**94%** Registry Exam pass rate of past students

This course will provide increased knowledge of the technical and clinical aspects of breast ultrasound as well as practical training of ultrasound imaging of the breast. An overview of the basic principles and techniques utilized in breast ultrasound will be presented. It will be helpful for mammographers and sonographers who are directly involved in breast imaging and physicians whose practice includes women's health. Participants should have an understanding of the basic concepts of mammography.

**17 Category A Credits & 16 AMA PRA Category 1 Credits™**

"This webinar was very informative and covered everything required for my registry. I will absolutely be using MTMI for furthering my education and passions."

Rachel - 8/20

"I learned so much! I will always recommend MTMI to others!!"

Carson - 4/20

**Faculty**

- Cheryl Seastrand, RT(R)(M)(BS)
- Nicole Simon, BA, RT(R), RDMS (AB, BR, NE, PS, OB/GYN) RVT(VT)

**SCHEDULE**

**Day One**

- Basic Physics of Ultrasound
- Breast Anatomy & Physiology
- Benign and Malignant Features
- Instrumentation & Technique
- Patient Care
- Artifacts

**Day Two**

- Benign Breast Lesions
- Malignant Breast Lesions
- Other Imaging Modalities
- Invasive Procedures
- Emerging Technologies

**2021 Course Dates:**
