

2022

Breast Ultrasound Course

This course will provide increased knowledge of the technical and clinical aspects of breast ultrasound as well as practical hands-on training of ultrasound imaging of the breast. An overview of the basic principles and techniques utilized in breast ultrasound will be presented. This course will be helpful for mammographers and sonographers who are directly involved in breast imaging and physicians whose practice includes women's health.

SCHEDULE

Day One

- Basic Physics of Ultrasound
- Breast & Axillary Anatomy & Physiology
- Benign & Malignant Features
- Instrumentation and Technique
- Patient Care
- Hands-on Scanning Workshop (classroom)
- Scanning Demonstration Videos (webinar)

Day Two

- Artifacts (Image Production)
- Evaluation of Equipment & Accessories
- Benign Breast Lesions & Conditions
- High Risk Conditions
- Malignant Breast Lesions
- Other Imaging Modalities
- Invasive Procedures
- Emerging Technologies

| Tuition | price | early price | member price | member early price |
