

# Magnetic Resonance Safety Expert (MRSE)

2018

9.5 Category A Credits & 8 CAMPEP Credits

**Instructor:** 

Max Amurao, PhD, MBA, DABR(D,N), MRSE, CMLSO

Webinar date:

January 20

August 11

October 13

Medical Technology
Management Institute

### **Overview**

This program is for medical physicists and others wanting to learn more about the technical aspects of MR imaging and those wishing to obtain the continuing education credits required for physicists by the ACR MRI facility certification requirements. It is also appropriate for medical physics students and residents, technically oriented radiologists, MRI technologists and MRI company personnel will also find it of value.

### dates and times listed on webpage

chedule

### **MRI Safety for Medical Physicists and MRI Scientists**

- Introduction

### **Static Magnetic Field**

**Time Varying Radiofrequency Fields** 

**Time Varying Magnetic Fields** 

MRI Safety – Accreditation and Regulatory Considerations

### **MRI Safety - Considerations for Engineering Controls**

- MR construction and shielding design
- MR safety zones
- MR safety equipment

### **MRI Safety - Considerations for Administrative Controls**

- MR safety training
- Signs and labels
- Access control
- MR safety committee

### MRI Safety – Considerations for Procedural Controls

- MR safety screening
- · Implants, devces, objects
- Patient positioning
- Claustrophobia, anxiety, distress

### **MRI Safety - Special Considerations**

- Pregnancy considerations
- Emergencies in the MRI environment
- Cryogen safety

### **Course Credit:**

This program provides 9.5 hours of Category A continuing education credit for radiologic technologists approved by ASRT and recognized by the ARRT and various licensure states. Category A credit is also recognized by CAMRT's Continuing Education Credit Approval Program for CE credit in Canada.

This program is designed to provide 8 hours of continuing education. The program has been submitted for approval by **CAMPEP** for Medical Physics Continuing Education Credit (MPCEC) for qualified medical physicists You must attend the entire program to receive your certificate of completion.

### About the Program

This program is designed for those individuals that anticipate fulfilling the role of MR Safety Expert and serve as a resource for the MR Safety officers and MR Medical Director. The MR Safety Expert is intended to possess knowledge and understanding of the physics related to MR safety issues and to provide guidance for those working in the MR industry. This program will provide you with the knowledge you will need to proceed to the next level and prepare you for the MRSE certification exam.

It seems likely that the majority of MRSO's will be MR technologists, and the majority of MRSEs will be MR physicists. However, this is not at this time a requirement of the ABMRS, and as of today, there are no specific requirements, achievements, education, or certification requirements as to who can apply to take the MRSO or MRSE examinations. The MRMD examination is designed for licensed physicians.

Note: This program is not affiliated with the ABMRS.
