

## ***Interventional Radiology Consulting Services***

1 Day or Multiple Day Engagements Available  
Onsite or Online

### **MTMI Consultants are Experts in IR.**

Interventional radiology (IR) is a medical subspecialty that performs various minimally-invasive procedures using medical imaging guidance, such as x-ray fluoroscopy, computed tomography, magnetic resonance imaging, or ultrasound. IR performs both diagnostic and therapeutic procedures through very small incisions or body orifices. Diagnostic IR procedures are those intended to help make a diagnosis or guide further medical treatment, and include image-guided biopsy of a tumor or injection of an imaging contrast agent into a hollow structure, such as a blood vessel or a duct. By contrast, therapeutic IR procedures provide direct treatment—they include catheter-based medicine delivery, medical device placement (e.g., stents), and angioplasty of narrowed structures.

### **Specialties**

- Clinical Training
- Organizational Structure
- Staffing Models
- Productivity
- Budgeting
- Effective Billing and Coding
- Capital Equipment Acquisition Advisement
