Breast Biopsy: Stereotactic and Ultrasound Guidance

June 5-6 - Online only
October 9-10 - format TBD
attend One or Both days

in partnership with
Mammotome

Day One: focus on NEW Tomosynthesis (3D)
& Stereotactic (2D)
Day Two: focus on Ultrasound

The first 12 physician registrants will have the opportunity for in-person hands-on clinical training at their facility. On-site training will be scheduled at a mutually agreeable time.
Upon completion of this course, you will be able to:
• Explain and provide an overview of biopsy options for detection of breast cancer.
• Discuss the differences in biopsy needles and stereo tables.
• Clarify the difference between polar and Cartesian coordinate systems.
• Describe the components of the stereo images and how they work together.
• Demonstrate the importance of needle position in correlation to the area of interest in stereotactic breast biopsy procedures.
• Formulate problem solving skills when faced with difficult scenarios in breast biopsy techniques.
• Demonstrate proper patient positioning for stereotactic biopsy procedures.
• Review the importance of QA, ACR and ASBrS requirements to help improve patient care and daily care of your center.
• Review breast ultrasound algorithm and terminology.
• Review ultrasound and mammographic correlation.
• Demonstrate how to use ultrasound equipment and minimally invasive techniques to accomplish ultrasound guided breast biopsy procedures.
• Discuss the importance of accurate tissue samples for accurate diagnosis.
• Identify high quality tissue and why it leads to high quality diagnosis.
• Explain artifacts that can lead to inconclusive results.

MTMI has many years of experience with on-line webinar training and has perfected a quality on-line experience.

As an added bonus we are offering in-person hands-on training with a Mammotome Specialist in the facilities of the first 12 physicians registering.

On-site training will be scheduled at a mutually agreeable time.

Educational Objectives

Upon completion of this course, you will be able to:
• Explain and provide an overview of biopsy options for detection of breast cancer.
• Discuss the differences in biopsy needles and stereo tables.
• Clarify the difference between polar and Cartesian coordinate systems.
• Describe the components of the stereo images and how they work together.
• Demonstrate the importance of needle position in correlation to the area of interest in stereotactic breast biopsy procedures.
• Formulate problem solving skills when faced with difficult scenarios in breast biopsy techniques.
• Demonstrate proper patient positioning for stereotactic biopsy procedures.
• Review the importance of QA, ACR and ASBrS requirements to help improve patient care and daily care of your center.
• Review breast ultrasound algorithm and terminology.
• Review ultrasound and mammographic correlation.
• Demonstrate how to use ultrasound equipment and minimally invasive techniques to accomplish ultrasound guided breast biopsy procedures.
• Discuss the importance of accurate tissue samples for accurate diagnosis.
• Identify high quality tissue and why it leads to high quality diagnosis.
• Explain artifacts that can lead to inconclusive results.

Accreditation
The Medical Technology Management Institute is accredited by the Accreditation Council for Continuing Medical Education to provide continuing medical education for physicians. The Medical Technology Management Institute designates this live activity for a maximum of 16.0 AMA PRA Category 1 Credits™ (8 credits each day). Physicians should claim only the credit commensurate with the extent of their participation in the activity.

Continuing Education
Category A/A+ CE credit is pending approval of the ASRT. An application for 8.5 credits per day has been filed. (total of 17 credits for entire 2 day course)

Nursing Credits
Provider approved by the California Board of Registered Nursing. Provider Number CEP # 16205 for 8 contact hours for each day, a total of 16 contact hours.

Conflict of Interest Statement
It is the policy of MTMI to ensure balance, objectivity and scientific rigor in all sponsored CME activities. All faculty and planners are required to disclose any related financial interests. Disclosures are reviewed and all conflicts of interest resolved. Disclosures will be shared at the course.
